

DURACELL®

Fahrenheit AGM

- Extra Heat Protection
- Trusted Starting Power

Duracell Fahrenheit AGM batteries have the technology and performance to meet all of your commercial vehicle needs.

Duracell Fahrenheit AGM commercial batteries are the only batteries with Thermal Shielding Technology. This technology not only protects from the heat but extends life under extreme conditions. Special innovations enable a battery that provides longer cycle service than an AGM product (50% longer under high heat test). Fahrenheit is tough enough to handle the extraordinary conditions where ordinary batteries give up and quit.

DuraMAT™ Components Feature More battery power protection with...

- Superior electrolyte absorption
- No free-flowing electrolyte
- Shock absorbing material
- Optimized power flow

Not just another battery offering, the Duracell AGM line delivers the best single source of premium AGM battery power solutions for the automotive, import vehicle, marine, power sports, and commercial markets. The variety in the Duracell AGM line has batteries to best service the vehicle and user's needs by integrating the optimal balance of starting, cycling, and deep cycling performance.

Designed for more efficient recharging, these batteries recover faster in the vehicle's charging system than conventional flooded batteries to deliver more accessory power longer.
